(559) 999-9353 | alec@mendiola.co | github.com/AlecMendiola | <http://mendiola.co/>

Computer Science Engineering (B.S.) – University of California, Merced (Fall 2019)

TECHNICAL SKILLS

C++	ReactNative	MySQL	Git
Python	PHP	SQLite	Symantec Ghost
Java	HTML	Firebase	Faronics Deepfreeze
JavaScript	ROS	Linux	ServiceNow

PROFESSIONAL EXPERIENCE

Firmware Engineer

Intel/Solidigm

(September 2021-October 2023)

- Designing, creating, & unit testing new features for Gen4 SSDs
- Debugging internal & customer issues in Gen3 SSDs using debugger, logs, and traces.
- Implementing firmware building structure in Gen4 SSDs for new firmware images
- Oversaw validation for new Gen3 SSD product into production
- Implementing firmware versioning for both internal and customer use
- Contribute to team design meetings for new features
- Actively participate in sprint stand ups and backlog grooming
- Reviewing team members' pull requests into production
- Documentation of features created by myself and my team by providing detailed descriptions and graphs

Software Engineer 1

Colsa Corporation | Datalink Gateway

(March 2020-September 2021)

- Top Secret Security Clearance
- Agile Software Development Environment
- Cipher Development & Bit Manipulation
- Debugging & Unit Testing Multithreaded Programs
- Porting Visual Studio projects from older platform toolsets
- Tool development (Hex Editor, C++ JSON Validator, Satellite API)
- Creating GUI through MFC
- Maintaining separate codebases through both DTR bug fixes and further development
- Independent tasking for additional features
- Powershell Scripting

PROJECTS

Mobile Application for Moves Training Team

- Mobile App featuring user location tracking, virtual check-in system, user statistic tracking, calendar event sign ups, and event creation.
- UC Merced's Innovate to Grow Mobile App Challenge Winner
- Developed using Javascript, Firebase, ReactNative, CSS

Advanced Encryption System (AES) Implementation

- Implementation of AES that could encrypt and decrypt messages.
- Developed using C++

Game of Thrones Database Website

(<http://gameofthroneswebzone.x10host.com/>)

- Website featuring a queryable database of characters and locations from HBO's Game of Thrones.
- Developed using HTML, CSS, PHP, MySQL

Discord Weather Bot

- Bot for Discord that gathers weather information for a user based on their locations as well as providing the top weather-related news story of the day.
- Developed using Python, Yahoo Weather API, News API
